

## Disadvantaged Student Report

### Y11 Progress update

January 2018

#### **Executive Summary**

Overall, DA students are predicted to make 'above average' progress, against non-DA counterparts, nationally. In particular, within English and Maths, their predicted progress is significantly above the national non-DA peer group. Predicted progress within EBacc is less strong, though the numbers involved are small, so like-for-like comparisons should not be made. In this case, individual students will be support targeted with support.

The mock outcomes indicate around a third of a grade 'gap', overall, with similar gaps in English and around two third gap in Maths. The EBAC gap is small.

The KPI outcomes for DA students point to an improvement over last year for both standard and strong passes. This gap between non-DA students has increased but overall outcomes are predicted to be higher.

Intervention plans are in place to ensure DA students meet with this predicted outcome.

Attendance figures for DA students are impacted upon by fixed term exclusions. The school is actively working to reduce this. A new detention system has been introduced. The effect of this will be to reduce exclusions and, since some DA students have had exclusions, their attendance should improve.
